MARTI BEACH CLEANER

The MARTI beach cleaner is operated by one person seated on an agricultural tractor, making beach maintenance efficient and safe. Designed to meticulously clean both surface debris and items buried in the sand—such as tins, plastic bottles, cans, cigarette ends, glass shards, pebbles, stones ranging from 1cm to 15cm in diameter, seaweed, seashells, sticks, wood logs, and other potentially harmful materials—it also proves effective on sidewalks, playgrounds, and horse rings.

Equipped with a spiked roller that breaks down compact or wet sand, the rotating spikes capture debris on the beach. Once inside, a vibrating grill sieves the sand and separates it from the waste, which is then hydraulically conveyed to a rear hopper, unloadable at a height of 180-200 cm.

This machine includes two robust sieving grills with different mesh sizes and features a galvanized interior for enhanced corrosion resistance in saltwater and sandy environments.

The TUTKUN beach cleaner complies with CE regulations.

TECHNICAL SPECIFICATIONS

MODEL	MARTI
DUMP HEIGHT	180 – 200 cm
CLEANING WIDTH	140 cm
CLEANING DEPTH	15 cm
CLANING SYSTEM	Sieve vibrating grill
HOPPER CAPACITY	0.35 m3
CLEANS UP TO	6822/7500 m2/h
DIMENSION (LxWxH)	230x166x155 cm
WEIGHT	769 kg
